Subject: MIL-S-901D High Impact Lightweight Shock Testing of an Azonix Model MP2500

Reference: (a) Azonix Purchase Order No. A59783, dated 09/28/2005
(b) HI-TEST Letter No. HT/17587A, dated 10/12/2005

Dear Mr. Mehta,

This letter serves as confirmation that HI-TEST conducted a Lightweight Shock Test in accordance with MIL-S-901D for unrestricted shock qualification of two systems per the Reference (a) contract. [Reference (b) confirms testing of the Azonix Model MP2030.]

Testing was performed on 29 September 2005. One (1), Azonix Model MP2500 (a compact and versatile 12" Propanel® with touchscreen option) was subjected to a complete test series of nine blows. The MP2500 did not present hazards during or following the test series (Similar to Grade B).

A preliminary test report will be submitted to Azonix within 15 business days of this letter. HI-TEST appreciates the opportunity to provide these test services and looks forward to working with Azonix in the future.

Very truly yours;
HI-TEST LABORATORIES, INC.

Laura Gayle Davis, Contract Administrator
